

Installing Firefox

1. Go to <http://www.firefox.com/>
2. Download the latest version of Firefox.
3. Run the file that you downloaded, which is the Firefox Setup Wizard.
4. Go through the setup Wizard until Firefox is installed.
5. Once you click "Finish," the Import Wizard will pop up.

6. It will ask you if you want to import all of your data from Internet Explorer. We strongly recommend this. Click "Next".
7. It will then ask you if you want to import your homepage as well, which is a good idea. Click "Next".

8. The settings will then be imported and Firefox will open.
9. Firefox is now ready to be used as your default Internet browser!
